

Let's help Mo! To get started, cut the large rectangle out of page two, fold along the dotted lines, and then cut the flaps. Have your child color in the images on page one and then help them cut the images out. Now it's time to build compound words! Glue the images to the flaps to find the words Mo is looking for. Your child can even come up with their own compound words—real or made up!

"Mo here!

Can you help me build
compound words?"

Can you help Mo find compound words using the images below?
